

Cervical Cancer Awareness Month

January 2026

January is **Cervical Cancer Awareness Month**, with **19–25 January** marking **Cervical Cancer Prevention Week**.

Workplaces play a vital role in promoting early detection, informed choices, and healthier habits. Raising awareness helps keep wellbeing visible, encourages open conversations, and supports a healthier, more productive workforce.

Cervical cancer is largely preventable through:

- Regular cervical screening
- HPV vaccination
- Awareness of symptoms and early action

Please contact us at hello@asepta.co.uk to obtain a high-resolution poster to display in your workplace.

**Early detection saves lives.
Let's keep prevention on the agenda this
January.**
